## About Project Euclid

**Project Euclid Prime Collection** is a high-impact, peer-reviewed titles in **theoretical and applied mathematics and statistics**. It is hosted by Project Euclid, an online platform for accessing the journals collection. The collection includes over 30 journals ( current and backfiles) and also complimentary access to archival content of over 9 journals.

Project Euclid was developed and deployed by the Cornell University Library and is jointly managed by Cornell and Duke University Press.

### Features of the collection include

- A redesigned website with enhanced functionality
- Perpetual access to purchased content
- Links from each article to MathSciNet, Zentralblatt MATH, and CrossRef
- Full-text searches across the entire collection
- COUNTER- and SUSHI-compliant usage statistics
- Interoperability through the Open Archives Initiative.
- MathJax display engine for clearly rendered formulas and symbols on all web browsers

- Total pages in Euclid 2,049,170 (1,458,838 open access)
