Indian Institute of Technology Gandhinagar (IITGn) on Wednesday signed a Memorandum of Understanding (MoU) with iCreate India to expand its outreach entrepreneurship programme.

The MoU was signed by Prof Sudhir K Jain, IITGN director, and Ulhas Kamat, CEO of iCreate India, at IIT Gandhinagar.

Jain said, "IIT Gandhinagar believes in being an involved member of the community and a good neighbour. We are constantly looking for ways to engage with and contribute to the local community."

"We are excited about our partnership with iCreate India, which will help us in expanding our outreach efforts in the neighbourhood by empowering street vendors and cleaning staff and other small providers of goods and services with basic business and entrepreneurship skills," he added.

iCreate India, a non-profit organisation that has been offering entrepreneurship programmes to disadvantaged youth and women since 1999.
