

## **IIT-GN teams up with ISRO for research**

**AHMEDABAD:** THE IIT-GN is teaming up with ISRO's Space Applications Centre (SAC) for research collaboration in areas of electronics, signal and image processing, electro-optical systems modelling. A MoU was signed by Sudhir K Jain, Director IIT-GN and A S Kiran Kumar, SAC, to promote active collaboration between the two institutes. A delegation of IIT-GN faculty members visited various facilities at SAC and interacted with their scientists. Under this agreement, IIT-GN students will undertake research internship at SAC on joint research projects of common interest to IIT-GN and SAC. In turn, IIT-GN will host scientists from SAC, who wish to engage in teaching and research and those interested in pursuing a higher degree. IIT-GN students, who already work as interns at SAC, presented their project highlights. Sensor Development Area Deputy Director Saji A Kuriakose stressed on the development of a miniature airborne platform, which will find significant use in local remote sensing. IIT-GN Director Sudhir Jain, meanwhile, said that the exposure of young minds to interesting projects will motivate them to take up even bigger challenges in the field of aerospace research. **ENS**
