

**IIT-Gn to host TEDx:** IIT-Gandhinagar will on Sunday organize a TEDx conference, which will feature speakers from diverse domains. TEDx is an offshoot of the popular TED conference, which began with talks on technology, entertainment and design. However, it has grown to encompass all sorts of ideas. TEDx events are independently organized by local groups. The event will feature eight speakers on subjects that range from spirituality, healthcare and design, to music and arts. TEDx events are not-for-profit conferences that host short talks by people who are successfully living their ideas that are worth spreading. These events are organized under licence from internationally renowned conference organizer TED, whose programmes have been viewed more than one billion times either live or online.
