**T**he Indian Institute of Gandhinagar's (IIT-Gn) is all set to welcome young engineers from across India and China at a three-day event to be held at its Palaj campus from Thursday. The first Indo-Chinese Young Engineering Leaders' Conclave will see a brainstorming session on pioneering technical work and leading edge research across a range of engineering fields of global importance.

Discussions will also be held on four themes — safety; health are devices; big data; and clean water. As per a note from the institute, 28 Indian and 13 Chinese delegates would take part in the event's technical presentations, group discussions, brainstorming sessions and come up with important recommendations.

IIT-Gn professor and one of the

### The 3-day conclave starts on Thursday

event coordinators, Pranab Mohapatra said, "The themes for the conclave include important topics for both India and China. Recommendations made at these sessions will help researchers, policymakers and others at different levels."

The participants will also get to take a heritage walk and attend a cultural programme. INAE and CAE have agreed to organize such conclaves for young engineering leaders from both the countries every year.
