

# Basic engg at IITGn's summer school

dna correspondent @dnaahmedabad

The Indian Institute of Technology Gandhinagar (IITGn) has organised a summer school on basic engineering topics from June 8 to July 4 at the Chandkheda campus. Topics like electrical machines and power electronics, engineering mathematics, structure of materials, geotechnical engineering laboratory and fluid mechanics will be taught at the school. Subjects like mechanics of solids, cloud computing, signals and systems, thermodynamics and linear systems-modelling, analysis and design will also be discussed.

A set of ten basic courses will be covered with an objective to provide the participants with better understanding. Last date of applications is May 20.
