

IIT workshop on variational analysis and optimisation

Indian Institute of Technology Gandhinagar (IIT-Gn) will be hosting an advanced level workshop on Variational Analysis and Optimization (NDEDCS-2013) from March 2 to 7. The event is held under National Program on Differential Equations : Theory, Computation & Applications (NPDE-TCA). The workshop will cover topics like Abstract Variational Principle and Elliptic Operators; Duality and Convex Optimization in R^n ; Controllability and Optimal Control among others.
