

## Riverfront on IIT-Gn's permanent campus

The upcoming permanent campus of IIT-Gn at Pilaj village in Gandhinagar will be unique with almost three-and-a-half km of riverfront at one edge of the site. The Sabarmati River is the central aspect of the entire design of the campus. At some parts of the riverfront, there are planned paths and jogging tracks. In addition, sports facilities have also been planned along the riverbank. The river will also be a prominent landmark while entering through the planned formal entryway. Similarly, two cafeterias and informal seating arrangements in the main academic area will overlook the river.
