

Int'l exposure main draw at IIT-Gn

Ahmedabad: International exposure was the main attraction for 2015-19 batch of B Tech students joining Indian Institute of Technology, Gandhinagar (IIT-Gn) this year.

As 136 students from across the country joined the five-week-long Foundation Programme on Thursday, many said that they chose IIT-Gn for its good international exposure. The five-week-long Founda-

tion Programme aims to immerse the students into various qualities of life before they begin their engineering curriculum.

The batch received students from 17 states from across the nation. While there were 14 students from Gujarat, 27 came from Rajasthan—the highest in number. The batch also had 22 students from UP and 17 from Maharashtra. TNN
