

# IIT-Gn to help find solutions to problems of Indian Army

Indian Army signed an MoU with IIT-Gn on Monday to set up a Research and Development cell which would focus on the finding solutions for Army's requirements.

IITGN director Sudhir Jain and Deputy Chief of Army Staff (Planning and System) Lt Gen Subrata Saha signed the MoU at the Palaj campus.

"The MoU will result in meaningful realisation and efficient transfer of re-

search into customised solutions for the Indian Army," Lt Gen Saha said.

The research cell will deal with Army's requirements such as lighter and stronger bullet-proof jackets and materials to build bunkers, among other things. Jain said, "The plan is to have a research centre through which our students and faculty can be in continuous touch with the army in researching and addressing these problems." **AM**
