Liquid nitrogen ice creams, walking on liquid and blowing balloons using dry ice, were some of the experiments, which more than 1,200 students from several schools of Gujarat, gazed at with awe. They were present at the science exhibition organised by IITGn on Saturday. The event was conducted under the banner of Rashtriya Avishkar Abhiyan and was also supported by the

Students witness one of the experiments

Sarva Shiksha Abhiyan (SSA) along with the Rashtriya Madhyamik Shiksha Abhiyan (RSMA).

In addition to several experiments, there were several projects and installations too, that were put

on display at the 50 stalls set up in the campus premises. Among these experiments, was an inflatable balloon inside which the students could crawl and engage in sky observation.
