Ahmedabad: The annual technical summit of the Indian Institute of Technology, Gandhinagar (IITGn), Amalthea 2016, is all set to inspire participants to address various challenges around them through the use of technology. The seventh edition of the two-day-long summit will begin on October 22 with the theme of 'Technologizing Challenges'.

Rajat Goel, core committee member of Amalthea 2016 said, "Amalthea has grown into one of the biggest technical summits organised in Gujarat over the past few years. The theme this year aims to encourage participants to use technology to address the challenges around us. Most problems that exist in the world today, including social, humanitarian or economical ones, can be solved if they are looked upon from a technological perspective."

Symposium on defence tech

The conclave, which consists of various talks this time, will host a symposium on 'Technologies in Defence and Internal Security'. It is an exclusive event which will be attended by postgraduate students and research enthusiasts from the city and addressed by experienced personalities from the field. Besides the symposium and the conclave, an exhibition on 'Expediting Development through Technology and Innovation' will also be hosted during the two day summit. It will showcase latest developments in science and technology.
