**Morocco**

**Kenya**

**India**

Fair Observer and the United Nations Foundation have launched the Voices of the World Program to train students and young journalists to focus on substantive issues such as water, health and poverty eradication.

We aim to inspire young minds from around the world to tell their own stories about substantive issues.

A community of 300 students from six countries will participate in our program. Participants will learn to use the tools of good journalism and to tell compelling stories to a global audience.
